

Active Harmer/Hostile Intruder Response

406.1 PURPOSE AND SCOPE

Agency Content

To properly respond to an active-shooter, armed intruder situation on all Colorado School of Mines properties and facilities. This policy shall apply to all sworn law enforcement responders with the Colorado School of Mines Department of Public Safety who are dispatched to one or more suspects who are participate in ongoing, random, or systematic violence, demonstrating the intent to harm others with the objective of mass murder.

406.2 BACKGROUND

Agency Content

Active harmer incidents require extraordinary efforts on the part of law enforcement. Although these attacks typically end within a very short duration, the incident and response actions may play out over an extended period of time and are often fluid and dynamic. These types of incidents may transition to a hostage or barricaded subject scenario.

406.3 RESPONSIBILITY

Agency Content

It shall be the Incident Commander on scene that assures compliance to this policy. When feasible and prudent, a Unified Command structure should be established so that a combination of responding resources can work collaboratively and more effectively.

406.4 POLICY

Agency Content

When possible, law enforcement, fire, and emergency medical services should train together in order to better understand tactics, strategies, terminology, and each agency's capabilities.

406.5 INITIAL ACTIONS

Agency Content

1. Initial Officers arriving to the scene or location shall take every action to immediately locate and neutralize the active and ongoing threat(s).
2. Establishing a Command Post should be a priority for arriving law enforcement supervisors/managers.
3. Develop a common communication plan and announce the location of the Command Post.
4. Life safety and medical treatment may be addressed once the threat(s) have been neutralized.
5. Preservation of evidence will be required following the threat(s) being neutralized and medical aid rendered.
